

Food Systems and Worker Health

The Roles of Health Systems and Communities

Join us for a discussion on the health, safety, and wellbeing of migrant farmworkers in the United States.

Dr. Seth Holmes analyzes the ways in which health and health care inequalities come to be understood as normal, and how recent social movements work to improve the health of migrant agricultural workers. In this talk, he will share the results of years of in-depth research and recommendations for the future.

KEYNOTE SPEAKER:

Seth M. Holmes, PhD, MD

*Chancellor's Professor, Division of Society and Environment,
Department of Environmental Science, Policy and Management
University of California Berkeley*
